

ASCEND AquaAlign

Water Conditioner

GENERAL INFORMATION

Ascend AquaAlign is a concentrated water-conditioning and pH-adjusting agent formulated with carboxylic acids, chelating agents, and ammonium sulfate. It conditions spray water by lowering and buffering pH while also binding calcium, magnesium, and other hard-water minerals that can interfere with pesticide and nutrient performance. Ammonium sulfate further optimizes spray applications by increasing active ingredient uptake. Final spray solution pH will vary based on water quality, initial pH, and product use rate; water testing is recommended to determine the appropriate rate for each application.

PRINCIPAL FUNCTIONING AGENTS

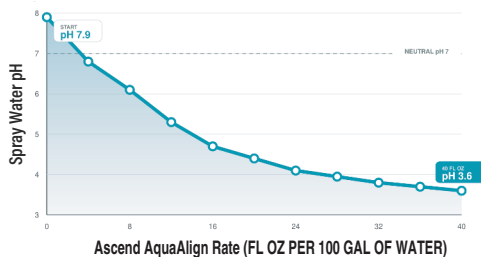

Proprietary Blend of Carboxylic Acids, 100%
Chelating Agents, and Ammonium Sulfate 100%
Total 100%
NPE & APE FREE

USE RATE

Fluid Ounces per 100 Gallons	Resulting Water pH
0 fl oz	7.9
4 fl oz	6.8
8 fl oz	6.1
12 fl oz	5.3
16 fl oz	4.7
20 fl oz	4.4
24 fl oz	4.1
28 fl oz	3.95
32 fl oz	3.8
36 fl oz	3.7
40 fl oz	3.6
