

ASCEND Defoamer

Liquid Antifoam

GENERAL INFORMATION

Ascend Defoamer is a liquid antifoam containing 10% active silicone for controlling foam in fertilizer and pesticide spray mixtures. Its dispersing and spreading properties provide fast, effective foam control, helping reduce product loss from spillage and spray-tank filling time.

Ascend Defoamer may be introduced through an induction system or added directly through the mix-tank opening.

PRINCIPAL FUNCTIONING AGENTS

Dimethylpolysiloxane and Methylated Silicone	10%
CONSTITUENTS INEFFECTIVE AS SPRAY ADJUVANT	90%
TOTAL	100%

NPE & APE FREE

KEEP OUT OF REACH OF CHILDREN

WARNING

Causes eye irritation and mild skin irritation.

PRECAUTIONARY STATEMENT

Wash hands, face, and other affected areas thoroughly after handling.

DIRECTIONS FOR USE

Application rates may vary based on the temperature, viscosity, agitation, and composition of the spray mixture.

For general use, add 1-2 fluid ounces of Ascend Defoamer per 100 gallons of spray solution. For best results, add Ascend Defoamer to the tank before adding fertilizers or pesticides. If foam develops during mixing, add Ascend Defoamer as needed until the desired level of control is achieved.

Before use, read and follow all directions, precautions, restrictions, and application requirements on this label and the pesticide label. The pesticide manufacturer's label takes precedence regarding specific uses and restrictions.
