

Fulvic Acids

NET CONTENTS:
2.5 U.S. GALLONS (9.46 L)

i GENERAL INFORMATION

This product supplies 20% fulvic acids derived from leonardite. It is formulated to complement starter fertilizer programs by supporting nutrient availability, uptake, and early-season plant development.

It may be applied through irrigation water or used in soil and foliar applications as part of a balanced crop-nutrition program. Application rates may vary based on crop requirements, soil conditions, and fertility recommendations.

d APPLICATION RATES

CORN

Apply 2-6 quarts per acre through irrigation water; two applications per year.

SORGHUM

Apply 2-6 quarts per acre through irrigation water; two applications per year.

DRIP IRRIGATION

Apply 6 quarts per acre. Repeat weekly as needed.

SOIL APPLICATION

Apply 2 quarts per acre to support nutrient absorption.

FOLIAR APPLICATION

Apply 1 quart per acre to support nutrient absorption.
