

ASCEND Tank Cleaner

Liquid Cleaner

GENERAL INFORMATION

Ascend Tank Cleaner is a concentrated liquid cleaner formulated to remove pesticide and fertilizer residues from spray tanks and application equipment. Its proprietary blend of surfactants, dispersants, and emulsifiers helps loosen and suspend residue so it can be flushed from tanks, pumps, hoses, valves, booms, and nozzles.

When used according to the rinsing directions, Ascend Tank Cleaner will not harm steel, aluminum, brass, poly tanks, or equipment components.

HANDLING AND STORAGE

Wear protective gloves, protective clothing, eye protection, and face protection. Do not breathe fumes, mist, vapors, or spray. Wash hands, face, and other affected areas thoroughly after handling. Do not eat, drink, or smoke while using this product.

Use only outdoors or in a well-ventilated area. Read the label before use. Store locked up. Read and understand the entire Safety Data Sheet, Directions for Use, and Notice of Warranty before using this product.

PRINCIPAL FUNCTIONING AGENTS

Proprietary Blend of Surfactants,
Dispersants, and Emulsifiers 100%
Total 100%

NPE & APE FREE

KEEP OUT OF REACH OF CHILDREN

DANGER

Causes severe skin burns and serious eye damage.

DIRECTIONS FOR USE

LARGE-VOLUME TANKS

Close the boom valve and add 100 gallons of water to the tank. Begin agitation and add 1 quart of Ascend Tank Cleaner. One gallon treats up to 400 gallons of water. Adjust the dilution rate as needed for individual conditions.

Circulate the cleaning solution through the valves, hoses, and pump. After the pump and tank interior have been cleaned, open the boom valve and discharge the solution through the boom and nozzles. Dispose of the cleaning solution according to the pesticide label and all applicable regulations.

Rinse the tank thoroughly with cold water for at least 3 minutes. Repeat the rinse before changing to a different chemical to reduce the possibility of cross-contamination.

When cleaning equipment that has contained herbicides capable of causing phytotoxicity at low concentrations, thoroughly clean components that may retain or absorb chemical residue, including hoses, connections, and pumps. Allow the cleaning solution to remain in the sprayer and its components overnight before completing the final rinse.

SMALL-VOLUME TANKS

Fill the tank half full with water. Add at least 1 fluid ounce of Ascend Tank Cleaner for every 3 gallons of tank capacity. Agitate thoroughly, drain the tank, and rinse with clean water. Dispose of all cleaning and rinse water according to the pesticide label and applicable regulations.
